

## POPULATION DISTRIBUTION

Greene County has over 48,000 residents. The county is predominately rural with only 30% of the population residing in urbanized areas. Population concentrations are found in the river towns which are home to 58% of the population.

The county has a large number of second homeowners that are not reflected in the Census population. A 1990 study estimated that Greene County had a part-time resident population of over 42,000 persons.
